“I had a magnificent time, and really learned a lot. The complete submersion in the Spanish language and culture not only really helped my vocal skills as a Spanish speaker, but also helped me understand Spanish and Latin American cultures. My favorite part of the camp was the energy at the camp. All of the staff were very helpful and uplifting.”

“I had an amazing time at the camp and made really good friends whom I will continue to keep in touch with. I also learned a lot about the culture of various Spanish-speaking countries through a variety of fun activities including art, games, dancing, and more”

“I was able to experience the culture of Hispanic countries to a greater extent than ever before. The counselors, other campers, activities and the village itself all played major roles in shaping this once in a lifetime experience.”

I had the time of my life at El Lago del Bosque, it was a completely unforgettable experience. From the moment you arrive, all counselors and staff speak in only Spanish. The camp is completely immersive and interactive. The counselors are speaking and interacting in Spanish and they are eager for you to learn and grow.”

“After two weeks immersed in Spanish and Spanish culture, I can confidently say that I am a better Spanish speaker and a more conscious, tolerant person.”

“When I first got there I was a little nervous about how it was going to go, but after I had made friends, the camp was incredible. Probably my favorite thing about the camp was the energy, the combination of singing, dancing, and activities throughout the day. I enjoyed the sports activities as well as the cultural ones.”
